This isn't just an e-book. It's a complete, interactive course.

By Nikki Toni

Tim Schmoyer has over 63,000 youtube subscribers, so I think it's safe to say that he knows what he's talking about when it comes to creating a youtube channel that gets noticed. The information in this course will change the way you think about your channel. It covers everything from Channel Branding (images, channel sections, thumbnails, etc.) to how to use keywords and titles to attract the right viewers to your videos.

For those of you who are worried about the price - look at it this way. The book is laid out so that everyday there's a different lesson. You are paying only \$1.00 per lesson.

Actually, that's not true. There are bonus resources and lessons in here so you're actually paying less than \$1.00 a lesson.

So the question then becomes, how much is it worth it to you to have a highly optimized channel that gets views and subscribers?

I have taken other youtube courses before, and I have studied other youtube books as well, and none of them have the vast amount of knowledge that this book does. So if you're serious about getting more subscribers and views, if you're ready to launch an incredible channel that you can be proud of, then you need to get your hands on this book!

Happy youtubing!

... I don't have the verified purchase mark) I heard great things about the book and thus

By Luigi

First of all I bought it directly from Tim Schmoyer's website (which is why I don't have the verified purchase

mark)

I heard great things about the book and thus, I bought it. Tim Schmoyer created a good 30 day plan hence the name or title of the book, he greatly pitches the plan with well thought-out written tips. Each day he has a specific task that he talks to you about and wants you to do something that has to do with the task at hand.

But the reason I didn't give it 5 stars is because it's full of basic information and tips I found for free on the internet reading articles on youtube and watching youtube videos that centered around "how to make your channel grow" and what-not.

I also have to say that I have been on youtube for a while but I started a channel in 2014 and it already has 17k subscribers, so someone like me wasn't really going to need this, I thought it was going to contain different information that I have never come across before, (which is why I bought it).

So bottom line is - if you are new to youtube and you haven't read articles or seen videos on making your channel bigger and look more professional, in other words if you have no idea of what you are doing, you have two options, OPTION 1 - buy this book, OPTION 2 -look up the information on the web (if you have the time and patience).
