More applicable learning than a whole year at University...

By Harry Desi

If you're already in the workforce and thinking of updating skills and knowledge by doing a few subjects at a College, try this little book first. It may be all you need, and more, at a fraction of the investment in time and money.

If you're a business student, this would be a great supplementary reader. Among other things, it's likely to keep your brain on the straight and practical.

Happy reading.

Mandatory text that was misrepresented to our class

By E. L. Robichaud

This book was required text for a class in Human Resources. We were told a background in finance management was not necessary for the text or the class. If you know little-to-nothing about the world of finance then you will be completely lost trying to understand this text. There is very little of term definitions and a whole lot of highly analytical theories and practices that require extensive background know-how. The title should really be "Finance and Accounting for People Already in Finance and Accounting."

Nonfinancial Managers BEWARE

By S. Webster

I had the same experience as another reviewer. This was the required text for a Financial Aspects course in my Human Resources studies. This text is not helpful at all if you do not have a background in finances.

Speaking from personal experience, calculus courses aren't even a sufficient pre-requisite. While I appreciate the smaller textbook in theory, it does not lend itself to the material covered in this book. Most of the tables are not on the same page or remotely near the material where they are referenced. I had also hoped with a text for "nonfinancial managers" that there would be a glossary of terms. No such luck. This text is very detailed and thorough but should not be a reference for "nonfinancial managers", as the title suggests. This is more of a pocket guide for those in the financial industry, as a refresher.
