Histology and Cell Biology: An Introduction to Pathology uses a wealth of vivid, full-color images to help you master histology and cell biology. Dr. Abraham L. Kierszenbaum presents an integrated approach that correlates normal histology with cellular and molecular biology, pathology, and clinical medicine throughout the text. A unique pictorial approach through illustrative diagrams, photomicrographs, and pathology photographs paired with bolded words, key clinical terms in red, and clinical boxes and "Essential Concepts" boxes that summarize important facts give you everything you need to prepare for your course exams as well as the USMLE Step 1.

- Access the fully searchable text online at studentconsult.com, along with USMLE-style multiple-choice review questions, and online only references.
- Easily find and cross-reference information through a detailed table of contents that highlights clinical examples in red.
- Review material quickly using pedagogical features, such as Essential Concept boxes, bolded words, and key clinical terms marked in red, that emphasize key details and reinforce your learning.
- Integrate cell biology and histology with pathology thanks to vivid descriptive illustrations that compare micrographs with diagrams and pathological images.
- Apply the latest developments in pathology through updated text and new illustrations that emphasize appropriate correlations.
- Expand your understanding of clinical applications with additional clinical case boxes that focus on applying cell and molecular biology to clinical conditions.
- Effectively review concepts and reinforce your learning using new Concept Map flow charts that provide a framework to illustrate the integration of cell-tissue-structure-function within a clinical-pathology context.

Build a stronger base of clinical knowledge through the integration of cell biology, histology, and pathology

This review is specific to the E VERSION

By jebuko

I bought the Kindle for PC version of this text. If you are buying the Kindle version of this book, beware. The resolution of the images is such that you can not read the accompanying text (the text that is part of the image). The pictures themselves are difficult to view. As this is a histology textbook, this is a MAJOR PROBLEM. Frankly, I'm surprised they offer this text in this version.

I really am not sure why they include images that are not in the original form with the original quality. It makes a good portion of this text useless. I called support for Kindle for PC and there is no solution.

Happily, I can get this purchase refunded. However, I'll be desperately squinting until my test on Thursday, trying to get what I can from this. Not enough time to buy the hard copy at this point. My eyes hurt.

Excellent textbook for histology students

By A Customer

I would recommend this book for anyone taking histology in medical school or undergrad. I am a med student and found this book much easier to learn from compared to other textbooks I have read. The author writes in a fashion that enhances learning. The pictures are also very good and helped me to further visualize the types of epithelia. I studied from the following which is also on amazon.com:

Histology Study Guide: Key Review Questions and Answers by Patrick Leonardi

This second book was so amazing because it had the kind of questions I saw on my histology exams. My study group and I used both these books and we all passed with ease and with less study time. Time is money. It's better to invest in a couple of excellent books than to take a \$2500 class all over again. I give both books 6 stars!!!!

Great book for histology class

By WequeMD

The pictures were the selling point in this book. It did go a little too far in depth for my histology class at the time, talking about subunit x of protein y connects to this subunit in this way. However, it became more useful when I got to phys and path. The diagrams were everything, and they supplemented the text well. It did not have as many real microscopic pictures as Wheaters, but I found the drawings more useful than just staring at a light pink blob by a darker pink blob.
