I purchased this silly light about 5 months ago, I also have 2 Inda-Gro lamps an Advanced Platinum Series 300w and a Apollo 100w lamp. This is by far the least effective of the bunch. I has a very modest output, disappointing. I use it as an addition to the Inda-gro in my 2'7" square tent. I adds a bit of red to the Inda-gro which can use it, also in this case the low power draw means less heat generation. So I kept this lamp for this specific purpose. As a stand alone grow lamps it is a rip off.
