Better than a pop can.

By C. Powell

It's a decent starting reference for those wanting to delve into 22 cal. silencer experimenting. Good pictures and lots of details on how to make examples in book.

Not worth the paper it was written on

By J. P. Jones

I just got taken for 10 dollars(plus shipping and handling). Do not be conned by this author. This is the most worthless book i have ever read in my life. The author even says in his "Apology" that he has never made or tested any of these silencers. None of these designs work, and some of them are dangerous. The people who wrote a good review of this book are either the author himself or on his payroll. Don't let them waste your money like they did mine. If you are interested in silencers just look for info online, this book tells you nothing useful at all.
